Re: Speed and Volume Data Collection & Review for
the Town of Cape Elizabeth

Introduction

PACTS requested a traffic data collection effort and speed and volume data review for the Town of Cape Elizabeth, Maine. Cape Elizabeth has a Traffic Calming Policy in place that provides a process for identifying, evaluating and addressing undesirable traffic conditions. The Town has received feedback from several residents regarding observed excessive vehicle speeds along the following roadways as located on the attached maps:

1. Shore Road at Ocean View Road
2. Fowler Road at Fenway Road
3. Mitchell Road at Meadowview Lane
4. Broad Cove Road at 21 Broad Cove Road

PACTS and the Town asked VHB to collect speed and volume data at each of these locations. VHB collected seven days' worth of Automatic Traffic Recorder (ATR) data which included data for speed, classification and volume during the week of June 15 – June 21, 2017. The ATRs were strategically placed to minimize slower moving traffic turning into and out of side streets/driveways and to capture the speeds on the straight portions of the requested study area while maintaining the desired location requests.

Existing Conditions

Shore Road is classified by the MaineDOT as a major/urban collector road with a posted speed limit of 30 mph. Shore road contains one lane in the northbound and southbound direction at this location between Ocean View Road and Island View Road. A sidewalk is provided on the east side of the roadway.

Fowler Road is classified by the MaineDOT as a rural local road with a posted speed limit of 30 mph. Fowler Road contains one lane in the eastbound and westbound direction at this location to the west of Fenway Road.

Mitchell Road near Meadowview Lane is classified by the MaineDOT as an urban local road with a posted speed limit of 30 mph. Mitchell Road contains one lane in the northbound and southbound direction at this location just south of Meadowview Lane.

Broad Cove Road is classified by the MaineDOT as a rural local road with a posted speed limit of 25 mph. Broad Cove Road contains one lane in the eastbound and westbound direction at this location to the west of 21 Broad Cove Road.

Speed and Volume Data

The following Table 1 summarizes the speed and volume data by roadway and direction.

Memorandum

Driving is a self-paced activity where each individual driver controls the speed of their vehicle according to perceived and actual roadway conditions. Posted speed limits provide the legal or allowed limit of travel speeds, which are enforced by law enforcement agencies. Statistical data for each of the 4 roadway locations is summarized in Table 1 (previous page). The average speed was calculated as the arithmetic mean of all the observed speeds (the sum of all speeds divided by the number of speed observations). The 85th percentile speed indicates the speed at or below which 85 percent of drivers consider safe and reasonable under ideal conditions. Pace speed is the 10 mph range of speed with the greatest number of observations. The ADT represents the average daily traffic for the Tuesday-Thursday weekday period. The Peak Hour and Midday Peak Hour volumes represent an average of the traffic during the peak hour for the Tuesday – Thursday weekday period. The detailed speed count reports, which include additional statistics such as 15th, 50th, and 95th percentile speeds, in addition to the volume and classification data are provided in the Appendix.

Shore Road (between Island View Rd and Ocean View Rd)

As shown in Table 1, the average and 85th percentile speeds recorded on Shore Road between Island View Road and Ocean View Road were 33 mph and 37 mph respectively. The average speed is approximately 3 mph above the posted speed limit of 30 mph. During the study week, Shore Road carried approximately 7,000 vehicles per day in both directions during the Tuesday-Thursday weekday period. The peak hours carried between 395-630 vehicles per hour in both directions during the Tuesday-Thursday weekday period.

Fowler Road (between 187 and 185)

As shown in Table 1, the average and 85th percentile speeds recorded on Fowler Road between 187 and 185 Fowler Road were 35 mph and 39 mph respectively. The average speed is approximately 5 mph above the posted speed limit of 30 mph. During the study week, Fowler Road carried approximately 1,205 vehicles per day in both directions during the Tuesday-Thursday weekday period. The peak hours carried between 85-105 vehicles per hour in both directions during the Tuesday-Thursday weekday period.

Mitchell Road (near 394)

As shown in Table 1, the average and 85th percentile speeds recorded on Mitchell Road near 394 Mitchell Road were 34 mph and 38 mph respectively. The average speed is approximately 4 mph above the posted speed limit of 30 mph. During the study week, Mitchell Road carried approximately 2,005 vehicles per day in both directions during the Tuesday-Thursday weekday period. The peak hours carried between 140-185 vehicles per hour in both directions during the Tuesday-Thursday weekday period.

Broad Cove Road (near 21)

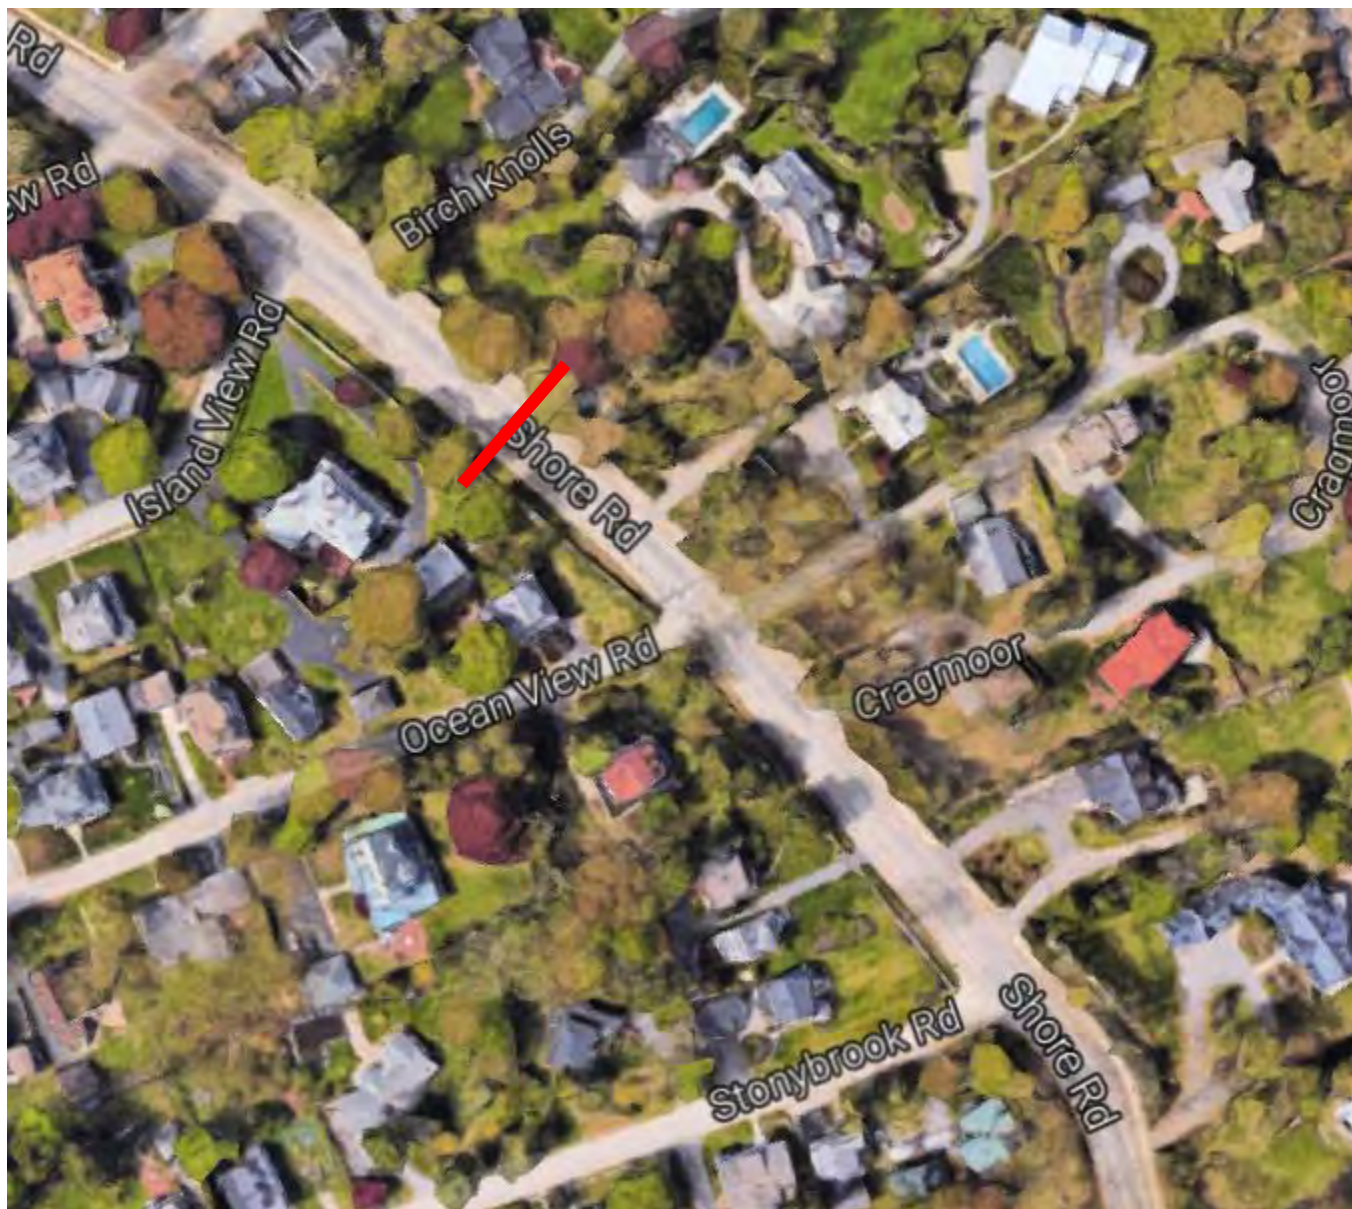

As shown in Table 1, the average and 85th percentile speeds recorded on Broad Cove Road near 21 Broad Cove Road were 28 mph and 32 mph respectively. The average speed is approximately 3 mph above the posted speed limit of 25 mph. During the study week, Broad Cove Road carried approximately 1,835 vehicles per day in both directions during the Tuesday-Thursday weekday period. The peak hours carried between 130-145 vehicles per hour in both directions during the Tuesday-Thursday weekday period.

Summary

In summary, the average 24 hour speeds on all four of the study area roadways did not exceed the posted speed limit by more than 5 mph. Based on the Town's Traffic Calming Policy, this data suggests that Shore Road, Fowler Road and Mitchell Road are not eligible for Passive Traffic Control Measures as described in the Policy draft. However, Broad Cove Road could be reviewed for the implementation of Passive Traffic Control Measures.

VHB is available to provide further traffic engineering and planning services should additional steps be requested such as analyzing these study area roadways using the USLIMITS2 tool or recommending Passive Traffic Control Measures.
