

## IMPLEMENTATION PLAN

The following chart lists the recommendations included in the previous chapters of the plan. For each recommendation, a primary implementing entity is designated with responsibility for the recommendation. The entity designated in no way limits the authority of the town council. This plan is intended to cover a 1-year period. For this reason, the chart also assigns priority for implementation as follows:

<b>Priority</b>	<b>Time Frame</b>
High	1-3 years
Medium	1-5 years
Low	5-10 years
Ongoing	Currently underway and should continue

Each recommendation is assigned a unique number to facilitate clarity in public participation as recommendations are discussed and assessment as recommendations are implemented. The town shall periodically (at least every 5 years) evaluate progress in implementing the plan.

[TO COMPREHENSIVE PLAN COMMITTEE: The draft recommendations list includes duplicate recommendations. The committee should consider selecting in which chapter a recommendation should appear, and then delete duplicate recommendations in other chapters. A reference to the recommendation can be included in the chapters where duplicates have been removed.]
