Hello,

I am writing an article about the Feb. 1 forum. I was just wondering if you could offer comment on the event/answer a question below?

Kind Regards

Rebecca Richard

South Portland Sentry

1. How was the public reception of the School Building Advisory Committee's Public Forum held on February 1, 2024, and what were some key takeaways from the community's engagement with the 7 conceptual design options presented by Harriman for the town's schools?
2. In the aftermath of the Public Forum on February 1, 2024, how has the feedback and perspectives shared by parents, teachers, students, and other residents influenced the decision-making process of the School Building Advisory Committee regarding the conceptual design options for Cape Elizabeth's schools?
3. Can you provide insights into the overall outcome of the Public Forum, including any notable consensus or divergence of opinions among the community members, and how this information will be utilized by the School Building Advisory Committee in shaping the future plans for our town's schools?

Under Maine's Freedom of Access law, documents - including e-mail - about town/school department business are classified as public records and may be subject to disclosure.

Michael,

Would you like to draft the response for Rebecca? I think it's a bit early for some of these questions. I'm not sure there's a lot to say until we have community feedback and the SBAC has had a chance to discuss.

Cindy

I think much too early to answer these. Perhaps we revisit this in a couple of weeks.

Perhaps we provide some limited information to broaden the publicity on this? (How many people attended, some of the comments that were made, how the SBAC is working with the town on a comprehensive understanding of financial matters, next steps, etc.)

I think we need to respond to this request. We're going to need the press to get the word out It's been my experience of the public information officer for the fire department of don't answer requests like this they are less likely to write you up later when you need it.

Patrick

I'll respond --but will basically be asking for more time to answer the questions, as we're still putting data out and collecting insights from the public.

Michael

This makes sense for the chair of the Communications Committee to respond. Thanks

Michael I agree much of this is premature ...

I think one answer is that this is where our committee will be rolling up their sleeves to pull from these options solutions that can be supported by the citizens .. I personally see this as a beginning we now have data to work with.
