Dear SBAC,

I am writing in support of Option E for the school building project because it is the only fiscally responsible option of the 3 choices (replacing both the middle and elementary schools would have been my first choice).

Putting money into a short-term solution (options B and C) does not make any sense as we would have to spend much more in the near future compared with Option E which gives us a long term solution for at least one of the schools.

Please do not keep putting off investing in our infrastructure that will cost much more in the long run with disruption to our students and teachers, higher energy and maintenance costs, and much more spending needed in the near term to keep the schools running and in the long term when new buildings are still needed in the not too distant future.

Option E is the only option I will support at the ballot box so please do not waste our money on short term solutions that will cost much more in the end.

Thank you,  
Barbara Toomey  
22 Woodcrest Rd.
