Good morning,

As a parent of a 4th and 7th grader I am urging you to move forward with option E.

Having reviewed all three options it is clear the other two are a waste of time, money and most importantly too disruptive for our students.

Invest in our children, education and infrastructure. Also building cooling should not be an option, it is essential!

And where are the renewable energy options? An area that is in full sun should be covered in solar panels.

Future proof the schools with option E and improve option E with cooling and renewable energy add ons.

Make the right choice as it's the only choice.

Thank you,
Stephen Rock
6 Wabun Road
