

RE: "600 Cottages" - Inn By The Sea

Dear Steve,

I have reviewed the calculations for existing and proposed impervious area, building floor area and building volume. It is my conclusion that the design as presented to me in the plans and calculations meet the Town's Zoning Ordinance Standards.

Sincerely,

Bruce S. Smith
Code Enforcement Officer

Bruce:

Attached is a letter with backup calculations and plans showing the site impervious area. The impervious sidewalk was calculated in CAD.

I trust this meets your needs and you will be able to prepare a letter stating that the proposed development meets the Town's ordinance requirements. Thank you for your help.

Steve
