Re: Pulpit Rock

Maureen, I am writing to let you know that the fire department is okay with the proposed road width of 14ft paved surface with two foot shoulders on each side. Because the road is at the end of an existing private road of the same width there is no advantage to us to have the last section be 22 feet wide. I would like to see some language that requires that the 14 foot width be maintained year round.

A handwritten signature in black ink that reads "Peter Gleeson". The signature is stylized and cursive.

Peter Gleeson
