Maureen,

We want to thank you and the Planning Board for convening the site walk yesterday to review the existing site conditions before we submit updated plans. As you are aware our clients are out of town and we will not be able to respond to the Boards questions until they return. We do intend to submit revised plans responding to your comments and the Town Engineers review comments. Given the time frame between the previous meeting and the site walk, revising the plans to address all comments including the planning board did not seem prudent before we had the site walk. We will revise the plans and obtain the answers to the Board questions prior to the public hearing understanding that the Board will not be able to action that evening. We look forward to meeting with the Board for the public hearing with the understanding that we will be tabled until the January meeting for final determination. Should you have any questions, please do not hesitate to contact me.

Regards,

Bob
