RE: Inspection of closed Town landfill

Dear Selectmen:

DEP staff recently completed a standard, periodic inspection of the closed Town landfill area. This landfill is located off Dennison drive near the transfer station and was closed in 1996 per Reduced Procedure requirements. Following are comments based upon the inspection and a review of the file:

1. The landfill area itself was in excellent condition with no overt evidence of erosion of surface soils. There were no obvious leachate seeps in the vicinity of the landfill either. No monitoring has been required for this site since it is reported that all nearby residents are hooked up to Town water. Please let me know if that is not the case.
2. The grass is very healthy and has apparently been cut over the landfill on at least an annual basis as is required. This annual mowing is required to discourage growth of woody vegetative species. Woody species are discouraged since they penetrate and damage the cover system that was established over the landfill.
3. A compost operation is in place very close to the toe of the landfill. There does not seem to be a problem with the closeness to the landfill, so long as the operation does not interfere with surface runoff and all landfill slopes remain stable.
4. The location which includes the transfer station has been gated and fenced. This effectively eliminates ATV use or illicit dumping of wastes.

5. DEP had previously allowed for placement of a road and transfer station canisters above the area of former solid waste ash. Please be sure that any possible changes to the transfer station area do not expand beyond the current footprint without DEP approval.
6. The Town has filed the appropriate, required Deed Affidavit for the site.

In sum, the Town continues to provide excellent maintenance for the closed landfill.

We encourage you to continue with this level of maintenance on a yearly basis. The Department will conduct periodic inspections of all closed landfills every several years to assure that sites are well maintained and that water quality issues have not arisen due to nearby construction of homes or placement of new water supply wells.

Please feel free to call at 287-8551 if you have any questions concerning the Town's post closure maintenance responsibilities for the landfill areas. Thank you.

Sincerely,
