Dear Town Council:

At your workshop on September 6, 2011, you postponed your discussion of the town center item to a continuation of the workshop to be held following the September 12th Town Council meeting.

You also indicated that you would individually indicate to me which of the original 37 recommendations you wished to discuss.

Attached is a spreadsheet the reflects the input I received back from the Town Council.

Mike

PS: The town center sidewalk lighting fixtures are being replaced as I write this. The new ones look great in my opinion. I look forward to seeing how they look when lit. They are LED fixtures.
