

Fire Department Proposed 5 Year Capitol Plan 2019-2023

2019 1.25 million to replace our 25 year old ladder truck and 15 year old ambulance. The ladder has served the community well but is reaching the end of its service life. We are proposing to replace the current ladder with a ladder truck that has a pump and carries water which our current truck does not. If we purchase this type of truck we will not replace our current Engine 3 which is scheduled to be replaced in 2020. This has the potential to save the town \$600,000.

2019 Ambulance Replacement \$250,000

One of our ambulances will be 15 years old and should be replaced. Most departments replace ambulances after 5-7 years of service. We are experiencing issues with rust on this truck and increased mechanical repairs.

2020

Stretcher Lift \$25,000

We would like to add an automatic stretcher lift to our older ambulance. This lift loads the stretcher and patient into the ambulance reducing the possibility of back injuries to our personnel.

2021 No requests at this time

2022 Replace SCBA Cylinders \$30,000

This will replace all 48 of our air cylinders that will be 15 years old this year and that is the end of their service life.

2023

Replace Engine 2 \$625,000

Engine 2 will be 25 years old and that will be the end of its expected service life.
